ANNOUNCING THE NEW USS McKEAN REUNION ASSOCIATION WEB SITE

Thanks to John Bishop (FTG2, 1964-1965) we have a new Web site. John has generously donated his time and expertise to his shipmates by setting up the new Web site and maintaining it. THANK YOU, JOHN.

Check out the site. The "Wall of Honor" tab lists our deceased shipmates we are aware of. If you know of any names that should be added, send an email to Joe Winkel with all the information you have.

Also, check out the "Reunions" tab. If you have any comments or pictures that you would like to have added, send these to Joe Winkel.

THE NEXT USS McKEAN REUNION WILL BE AT BRANSON, MO. SEPT., 2011

We are locked into contractual numbers so we need to determine approximately how many people will attend the reunion. Even if you don't make reservations yet, please let Chuck Horvath know ASAP if you plan to attend. Plans can change, but we need a planning estimate. Contact Chuck at e-

mail taxshop1@aol.com or by mail P.O. Box 509 Nevada, MO 64772.

The reunion will be held on Friday 9-23-2011, Saturday 9-24-2011 and Sunday 9-25-2011 at the Radisson Hotel Branson, Mo.

The Tentative Schedule is:

- Friday - 10:00 AM Registration and Hospitality Room opens.
- Saturday – 8:00 AM Hospitality Room open
8:30 AM Board Bus to Veterans Memorial Museum
10:30 AM Board Bus to Branson Belle Showboat
11:30 AM McKean Memorial Service aboard the Branson Belle
12:00 AM Lunch and Entertainment aboard the Branson Belle
2:30 PM Board Bus to the Branson Landing; a 95 acre retail and entertainment promenade. There is no scheduled activity. This is free time.
- NOTE: Trolley service is available at the Landing for non-walkers.
- 4:00 PM Board Bus back to Radisson Hotel
7:00 PM Raffle, Auction, and Discuss the Next Reunion.

Sunday - 8:00 AM Hospitality Room opens.
Free Time Until 4:30 PM.
4:30 PM Pictures taken
6:00 PM Banquet and Guest Speaker

You can make reservations at the Radisson Hotel by calling 1-800-333-3333 (or 417-335-5767) before July 31, 2011. Specify that you are with the USS McKean Reunion for a special room rate of \$93.00 per night plus taxes. This rate is being offered by the hotel for up to 3 days before the reunion and 3 days after the reunion.

SHIPMATE CONTRIBUTIONS

From Bob Tokarczyk

U.S.S. Barb: The Sub that Sank a Train

In 1973 an Italian submarine named Enrique Tazzoli was sold for a paltry \$100,000 as scrap metal. The submarine, given to the Italian Navy by the U.S. Navy in 1953 was actually an incredible veteran of World War II service with a heritage that never should have passed so unnoticed into the graveyards of the metal recyclers. The U.S.S. Barb was a pioneer, paving the way for the first submarine launched missiles and flying a battle flag unlike that of any other ship. In addition to the Medal of Honor ribbon at the top of the flag identifying the heroism of its captain, Commander Eugene "Lucky" Fluckey, the bottom border of the flag bore the image of a Japanese locomotive. The U.S.S. Barb was indeed, the submarine that "SANK A TRAIN".

July, 1945 (Guam) Fleet Admiral Chester Nimitz looked across the desk at Admiral Lockwood as he finished the personal briefing on U.S. warships in the vicinity of the northern coastal areas of Hokkaido, Japan. "Well, Chester, there's only the Barb there, and probably no word until the patrol is finished. You remember Gene Fluckey?"

"Of course, I recommended him for the Medal of Honor," Admiral Nimitz replied. "You surely pulled him from command after he received it?"

July 18, 1945 (Patience Bay, off the coast of Karafuto, Japan) It was after 4 A.M. and

Commander Fluckey rubbed his eyes as he peered over the map he read before him. It was the twelfth war patrol of the Barb, the fifth under Commander Fluckey. He should have turned command over to another skipper after four patrols, but had managed to strike a deal with Admiral Lockwood to make one more trip with the men he cared for like a father, should his fourth patrol be successful. Of course, no one suspected when he had struck that deal prior to his fourth and what should have been his final war patrol on the Barb, that Commander Fluckey's success would be so great he would be awarded the Medal of Honor.

Commander Fluckey smiled as he remembered that patrol. "Lucky" Fluckey they called him. On January 8th the Barb had emerged victorious from a running two-hour night battle after sinking a large enemy ammunition ship. Two weeks later in Mamkwan Harbor he found the "mother-lode"...more than 30 enemy ships. In only 5 fathoms (30 feet) of water his crew had unleashed the sub's forward torpedoes, then turned and fired four from the stern. As he pushed the Barb to the full limit of its speed through the dangerous waters in a daring withdrawal to the open sea, he recorded eight direct hits on six enemy ships. Then, on the return home he added yet another Japanese freighter to the tally for the Barb's eleventh patrol, a score that exceeded even the number of that patrol.

What could possibly be left for the Commander to accomplish who, just three months earlier had been in Washington, DC to receive the Medal of Honor? He smiled to himself as he looked again at the map showing the rail line that ran along the enemy coast line. This final patrol had been promised as the Barb's "graduation patrol" and he and his crew had cooked up an unusual finale. Since the 8th of June they had harassed the enemy, destroying the enemy supplies and coastal fortifications with the first submarine launched rocket attacks. Now his crew was buzzing excitedly about bagging a train.

The rail line itself wouldn't be a problem. A shore patrol could go ashore under cover of darkness to plant the explosives...one of the sub's 55-pound scuttling charges. But this early morning Lucky Fluckey and his officers were puzzling over how they could blow not only the rails, but one of the

frequent trains that shuttled supplies to equip the Japanese war machine.

Such a daring feat could handicap the enemy's war effort for several days, a week, perhaps even longer. It was a crazy idea, just the kind of operation "Lucky" Fluckey had become famous...or infamous...for.

But no matter how crazy the idea might have sounded, the Barb's skipper would not risk the lives of his men. Thus the problem... how to detonate the charge at the moment the train passed, without endangering the life of a shore party. PROBLEM? Not on Commander Fluckey's ship. His philosophy had always been "We don't have problems, only solutions".

11:27 AM "Battle Stations!" No more time to seek solutions or to ponder blowing up a train. The approach of a Japanese freighter with a frigate escort demands traditional submarine warfare. By noon the frigate is laying on the ocean floor in pieces and the Barb is in danger of becoming the hunted.

6:07 PM Solutions! If you don't look for them, you'll never find them. And even then, sometimes they arrive in the most unusual fashion. Cruising slowly beneath the surface to evade the enemy plane now circling overhead, the monotony is broken with an exciting new idea. Instead of having a crewman on shore to trigger explosives to blow both rail and a passing train, why not let the train BLOW ITSELF up. Billy Hatfield was excitedly explaining how he had cracked nuts on the railroad tracks as a kid, placing the nuts between two ties so the sagging of the rail under the weight of a train would break them open. "Just like cracking walnuts," he explained. "To complete the circuit (detonating the 55-pound charge) we hook in a micro-switch .between two ties. We don't set it off, the TRAIN does." Not only did Hatfield have the plan, he wanted to be part of the volunteer shore party.

The solution found, there was no shortage of volunteers, all that was needed was the proper weather...a little cloud cover to darken the moon for the mission ashore. Lucky Fluckey established his own criteria for the volunteer party: ...No married men would be included, except for Hatfield...The party would include members from each department... The opportunity would be split

between regular Navy and Navy Reserve sailors... At least half of the men had to have been Boy Scouts, experienced in how to handle themselves in medical emergencies and in the woods....FINALLY, "Lucky" Fluckey would lead the saboteurs himself.

When the names of the 8 selected sailors was announced it was greeted with a mixture of excitement and disappointment. Among the disappointed was Commander Fluckey who surrendered his opportunity at the insistence of his officers that "as commander he belonged with the Barb," coupled with the threat from one that "I swear I'll send a message to ComSubPac if you attempt this (joining the shore party himself)." Even a Japanese POW being held on the Barb wanted to go, promising not to try to escape.

In the meantime, there would be no more harassment of Japanese shipping or shore operations by the Barb until the train mission had been accomplished. The crew would "lay low", prepare their equipment, train, and wait for the weather.

July 22, 1945 (Patience Bay, off the coast of Karafuto, Japan) Patience Bay was wearing thin the patience of Commander Fluckey and his innovative crew.

Everything was ready. In the four days the saboteurs had anxiously watched the skies for cloud cover, the inventive crew of the Barb had built their micro-switch. When the need was posed for a pick and shovel to bury the explosive charge and batteries, the Barb's engineers had cut up steel plates in the lower flats of an engine room, then bent and welded them to create the needed tools. The only things beyond their control was the weather....and time. Only five days remained in the Barb's patrol.

Anxiously watching the skies, Commander Fluckey noticed plumes of cirrus clouds, then white stratus capping the mountain peaks ashore. A cloud cover was building to hide the three-quarters moon. This would be the night.

MIDNIGHT, July 23, 1945 The Barb had crept within 950 yards of the shoreline. If it was somehow seen from the shore it would probably be mistaken for a schooner or Japanese patrol boat. No one would suspect an American

submarine so close to shore or in such shallow water. Slowly the small boats were lowered to the water and the 8 saboteurs began paddling toward the enemy beach. Twenty-five minutes later they pulled the boats ashore and walked on the surface of the Japanese homeland. Having lost their points of navigation, the saboteurs landed near the backyard of a house.

Fortunately the residents had no dogs, though the sight of human AND dog's tracks in the sand along the beach alerted the brave sailors to the potential for unexpected danger.

Stumbling through noisy waist-high grasses, crossing a highway and then stumbling into a 4-foot drainage ditch, the saboteurs made their way to the railroad tracks. Three men were posted as guards, Markuson assigned to examine a nearby water tower. The Barb's auxiliary man climbed the ladder, then stopped in shock as he realized it was an enemy lookout tower....an OCCUPIED tower. Fortunately the Japanese sentry was peacefully sleeping and Markuson was able to quietly withdraw and warn his raiding party.

The news from Markuson caused the men digging the placement for the explosive charge to continue their work more slowly and quietly. Suddenly, from less than 80 yards away, an express train was bearing down on them. The appearance was a surprise, it hadn't occurred to the crew during the planning for the mission that there might be a night train. When at last it passed, the brave but nervous sailors extracted themselves from the brush into which they had leapt, to continue their task. Twenty minutes later the holes had been dug and the explosives and batteries hidden beneath fresh soil.

During planning for the mission the saboteurs had been told that, with the explosives in place, all would retreat a safe distance while Hatfield made the final connection. If the sailor who had once cracked walnuts on the railroad tracks slipped during this final, dangerous procedure, his would be the only life lost. On this night it was the only order the saboteurs refused to obey, all of them peering anxiously over Hatfield's shoulder to make sure he did it right. The men had come too far to be disappointed by a switch failure.

1:32 A.M. Watching from the deck of the Barb, Commander Fluckey allowed himself a sigh of

relief as he noticed the flashlight signal from the beach announcing the departure of the shore party. He had skillfully, and daringly, guided the Barb within 600 yards of the enemy beach. There was less than 6 feet of water beneath the sub's keel, but Fluckey wanted to be close in case trouble arose and a daring rescue of his saboteurs became necessary.

1:45 A.M. The two boats caring his saboteurs were only halfway back to the Barb when the sub's machine gunner yelled, "CAPTAIN! Another train coming up the tracks!" The Commander grabbed a megaphone and yelled through the night, "Paddle like the devil!" knowing full well that they wouldn't reach the Barb before the train hit the micro-switch.

1:47 A.M. The darkness was shattered by brilliant light and the roar of the explosion. The boilers of the locomotive blew, shattered pieces of the engine blowing 200 feet into the air. Behind it the cars began to accordion into each other, bursting into flame and adding to the magnificent fireworks display. Five minutes later the saboteurs were lifted to the deck by their exuberant comrades as the Barb turned to slip back to safer waters. Moving at only two knots, it would be a while before the Barb was into waters deep enough to allow it to submerge. It was a moment to savor, the culmination of teamwork, ingenuity and daring by the Commander and all his crew. "Lucky" Fluckey's voice came over the intercom. "All hands below deck not absolutely needed to maneuver the ship have permission to come topside." He didn't have to repeat the invitation. Hatches sprang open as the proud sailors of the Barb gathered on her decks to proudly watch the distant fireworks display. The Barb had "sunk" a Japanese TRAIN!

On August 2, 1945 the Barb arrived at Midway, her twelfth war patrol concluded. Meanwhile United States military commanders had pondered the prospect of an armed assault on the Japanese homeland. Military tacticians estimated such an invasion would cost more than a million American casualties. Instead of such a costly armed offensive to end the war, on August 6th the B-29 bomber Enola Gay dropped a single atomic bomb on the city of Hiroshima, Japan. A second such bomb, unleashed 4 days later on Nagasaki, Japan, caused Japan to agree to surrender terms on August 15th. On September 2, 1945 in Tokyo

Harbor the documents ending the war in the Pacific were signed.

The story of the saboteurs of the U.S.S. Barb is one of those unique, little known stories of World War II. It becomes increasingly important when one realizes that the 8 sailors who blew up the train at near Kashiho, Japan conducted the ONLY GROUND COMBAT OPERATION on the Japanese "homeland" of World War II. The eight saboteurs were: Paul Saunders, William Hatfield, Francis Sever, Lawrence Newland, Edward Klingsmith, James Richard, John Markuson, and William Walker.

NOTE: Eugene Bennett Fluckey retired from the Navy as a Rear Admiral, and wears in addition to his Medal of Honor, FOUR Navy Crosses... a record of awards unmatched by any living American. In 1992 his own history of the U.S.S. Barb was published in the award winning book, THUNDER BELOW. Over the past several years proceeds from the sale of this exciting book have been used by Admiral Fluckey to provide free reunions for the men who served him aboard the Barb, and their wives. Admiral Fluckey was born in Washington, D.C. in 1913 and graduated from the U.S. Naval Academy in 1935. He died 28 June 2007 in Annapolis, Maryland.

From Dick Shaw

This is the article in November, 2010 "Wreck Diving Magazine". <http://wreckdivingmag.com/>

Click on the picture and you can see the trip that Ken and others took to Japan in June looking for the sunken Russian submarine.

Best regards,
Dick

Editor's Note: This diving expedition is looking for the Russian submarine whose sinking has been attributed to the USS McKean by many accounts.

PLEASE SEND IT TO JOE WINKEL AT joe.winkel@comcast.net.**

From Ralph Castillo

While serving aboard the McKean DDR-784 on May 14, 1955 we took part in the "Operation Wigwam" Underwater A-Bomb blast. There is a lot of information now released about that time when we were 5 miles away from zero point when they shot off that 30 kiloton blast. At the time we were told not to discuss anything with the public, that was "Top Secret" I guess in the last few years they have opened the records of Operation Wigwam for all to view. I hope to make the 2011 reunion. I try to keep active at 73 years young, I scuba dive as often as possible, made 2 ea. 8 day trips in 2009 to Cozumel, Mex. we dove at least 15 deep dives each trip. Keep up the great work with the Mighty Mac history.
